## ComputerVault to Support new Exhibit in Worcester's EcoTarium *Company to Support the "How People Make Things" Exhibit*

Worcester, MA – ComputerVault Inc. announced today it will become an official sponsor of a summer exhibit heading to Worcester's EcoTarium museum of science and nature. In deepening its roots and investments in the greater Worcester area, ComputerVault will support the "*How People Make Things*" exhibit, available for visitors from May 28 – September 18. The exhibit demonstrates the familiar ways in which childhood objects are manufactured and the people, ideas, and technology used to transform raw materials into finished products through an interactive experience.

ComputerVault recently relocated its headquarters to Worcester and plans to add more than 50 jobs in the months ahead to the area's workforce. The company found the EcoTarium as a perfect fit for its regionally targeted philanthropy. "As we continue to fall in love with our city and its people, we're proud to support some of the area's best organizations, and to further enrich the community we all share," said Marc Zarrella, VP, Head of Revenue and Partnerships at ComputerVault. The company chose March 3, 2022, World Wildlife Day, as a fitting day to announce the investment.

"The EcoTarium is excited to partner with ComputerVault to bring *How People Make Things* to the public," said Katie Chappell, EcoTarium Director of Education & Exhibits. The exhibit offers hands-on activities using factory tools and machines to create objects with four manufacturing processes - molding, cutting, deforming, and assembly. Our community will have the opportunity to experience how ideas are formed with technology, highlighting STEM opportunities while learning about our own community's history. We are excited for ComputerVault to become part of the Worcester history and community."

ComputerVault is well-suited to sponsor an exhibit that brings the manufacturing experience to life for children in an inspiring and educating atmosphere. EcoTarium houses interactive exhibits, science discovery programs, planetarium, live animal habitats, nature trails, and more across its 45-acre campus. For museum times, admission, and questions, visitors may visit [www.ecotarium.org](http://www.ecotarium.org), or call 508-929-2700.

### **About ComputerVault**
